

TOMATO MASKOTKA

A completely determinate Bush Tomato of a small fruited type which crops abundantly giving up to 2 kilos of fruit per plant. The flavour of the fruit is exceptional and the fruit quality is good with fruits of 3cm diameter being produced throughout the season.

Maskotka is the ideal choice for us in hanging baskets, containers and pots. The plants naturally trail over the edge of the container. basket after the fruits have formed.

AN EXCITING
NEW
COLOUR
AND
FLAVOUR

An exciting **Novelty**, superb addition for the plant and home garden market.

Black Cherry is an **Indeterminate (Cordon Type)** for indoor/outdoor summer production.

70-75 days from planting **Black Cherry** will produce the most amazing coloured "**Deep Mahogany**" cherry sized fruits resembling that of the famous "**Morello Cherry**". These juicy gems are produced in abundance with a well balanced flavour which is rich and sweet.
